IN BULK

Season of 1948

"At Your Service
For the 52nd Year"

THE PAGE SEED COMPANY
GREENE - - NEW YORK

Greene, New York
February 1948

Dear Mr. Dealer,

Another year has rolled around and in our 52 years in business we cannot remember a time when Mother Nature has done a better job of mixing up the weather.

The Farmer could not get on his land to plant his seed due to the very wet spring. The Retailer was unable to dispose of his seed stock on hand. The Wholesaler was caught in the middle. And the Seed Growers in many sections of the country were not only hampered by the wet weather early, but had a hot, dry spell later on to be followed by a very early freeze.

In addition to the effect of unfavorable weather during the growing season, American seed stocks will be further reduced by the shipment of large quantities of seeds to Europe under the Marshall Plan and by the European Gift Seed Package program now being sponsored by the American Seed Trade Association.

As a result of all this, several varieties of seed are short this spring or cannot be obtained at all. It is suggested that when you order additional quantities, you mention a substitute wherever possible. This is particularly true on Peas, Beans, and Corn.

But what about the demand for seeds this spring? Given favorable planting weather, we believe the demand this year will be unusually high. High food costs, which promise to go even higher, will drive more people to gardening in an effort to raise some of their own food.

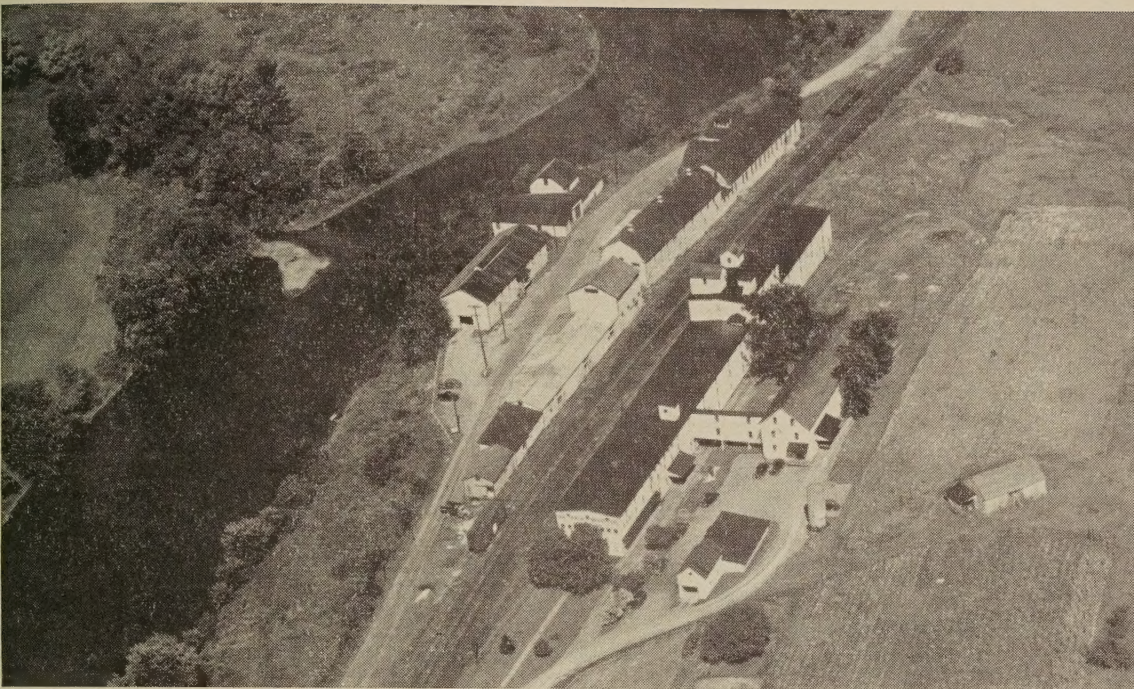

Since we are facing a heavy potential demand with stocks depleted by bad weather in 1947 and shipments to Europe, we suggest that you anticipate your requirements and order early to insure an adequate supply. We have listed the more important varieties. Select from them, those that are most commonly used in your locality. Where the price does not appear, we are sold out or have a very limited supply.

We realize that many of our dealers have a carry over of seeds from last year. If you are in this position we wish to remind you that most states require vegetable seeds offered for sale to be tested and dated.

We trust that Mother Nature will be more kind to all of us this season and that we may have the pleasure of continuing to serve you on your requirements.

With best wishes for a successful year,

THE PAGE SEED CO.

THIS is our Spring Price List for 1948. Due to some crop failures and some shortages, we are not able to offer certain items. Where these occur we hope that you will be able to make another selection that will serve as a substitute. All previous quotations are cancelled. These prices are offered with the understanding that they are subject to change without advance notice, and subject to stock remaining unsold when the order is received.

These are Dealer prices, that is for those firms that resell seed at retail. Terms on orders are: Vegetable and Flower seed— $1\frac{1}{2}\%$ 10 days, 60 days Net to firms of approved credit rating, or for cash with the order, F.O.B. Greene, N. Y. All other items listed are: Net Cash (no discount), or cash with order, F.O.B. Greene, N. Y.

All orders shipped out by us are sent with the understanding and agreement that "The Page Seed Company gives no warranty express or implied, as to purity, description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and will not be in any way responsible for the crop." Our liability in any instance shall be limited to the purchase price of the item.

Wholesale Price List

BEANS

* Lilliput Mixed —Tiny, very double flowers.....	6.00
* Mexican Mixed —Dwarf plants, Miniature blooms.....	7.50

LAWN GRASS MIXTURES

It is our belief that when planting a lawn, the best is none too good. For that reason, we do not try to see how cheap a mixture we can make up. We try to use seed of high purity and germination. Thus, our mixtures are as free from weed seed and inert matter as we can make them. We strive to have quality mixtures that will produce the lawns any householder can be proud of showing.

Terms are Net Cash

	Per lb.	In 100 lb. Bag Lots

PACKET SEEDS

If you do not already have a display of Page's Seed Packets ordered, you can still send in an order. An assortment of Vegetable and Flower Packets will be sent, shipping charges prepaid. These cases of packets are supplied to Dealers on a Contract of Sale and Return. The unsold packets are returned at the close of the season for credit. The discount on sales is based upon the volume of sales made. The more you sell, the higher the discount.

All displays should be checked frequently during the selling season and orders placed for additional packets when it is seen that the supply is running low. By maintaining your supply, you increase your sales.

The varieties of seed listed in this price list with a * in front are to be found in nearly all of our regular assortments.
